Author's preface

Concept and mission of the Hyperborean Initiative (HI)

Detailed exposition of all aspects of the plan

Reflections on the Aryan Cause and peaceful intent

Appendix: Translation of Kaj Munk's Danish poem "The Blue Anemone"

Abstract

This essay is yet another step forward in furthering the plan of the Hyperborean collective, the Hyperborean Siddhas of the North. In the text, we present a detailed exposition of phase II out of four phases of our Masterplan to create the New Ethereal Atlantis. This phase II, which we have recently entered, is set to last approximately 7-8 years, of course depending on how soon we will make progress in regards to the strategic goals outlined in this essay. The essay is a scholarly exposition of the ideas, theories and concepts, underlying and giving credence to our spiritual-revolutionary movement. We firmly believe in the academic, scholarly epistemic discourse to ground our aspirations, and we always seek reflection from and dialogue with our readers, so the project of a new order is grounded in solid and ethical findings as to the nature of man, the nature of creation and the spiritual purpose and destiny of mankind. In the essay, we describe how we conceptualize terms such as "Aryan", Siddha" and "White Order", so not to cause any confusion in terminology. The program is a perfectly peaceful and benevolent program, as we seek to unchain ourselves from the historical burdens of a world history of conflict and strife to arrive at a much better future for all the good of mankind – a new golden age, which is our ultimate goal. This essay carries and builds on the ideas, theories, concepts and plans, as they have been laid out in our previous range of essays from the last couple of years, in all presenting an original, unique, innovative and authoritative perspective on the modern day life, culture, aspirations and agenda of the Siddhas of the North. This is the next step.

Author's preface

This essay presents an esoteric, metaphysical, spiritual and symbolic framework for carrying out the so-called “Masterplan of the Aryan Order”.

All references to terms such as “Aryan”, “Siddha”, “White Order” and “White Propaganda” are meant solely in a spiritual, cultural and metaphorical sense with the purpose of aligning all people of the heart in a common enterprise for a much better future – a new golden age – and is not meant to refer to any biological, ethnic determinism or supremacy.

In presenting this essay, we wish for all good people to relate to the ideas presented, and we seek to inspire all true seekers of the soul to contribute to the ideas and plans laid out in this essay.

In no way do we condone any type of hatred, aggression or violence for a political cause, even as this cause might seem controversial given to its ambitious and spiritual-revolutionary nature.

The reason that some of these ideas might on the surface seem controversial is because of the deep-seated history of mankind of conflict and strife, a situation, which we seek to resolve by presenting the true theology and metaphysics from the authoritative perspective of the Hyperborean Siddhas of the North.

This essay is a conceptual essay, which seeks to inspire all good people to think anew, contemplate and reflect upon some of these crucial questions and answers raised in this essay.

Concept and mission of the Hyperborean Initiative (HI)

This essay explores the phase II of the Masterplan of the Aryan Order (AO), as we have detailed this plan in a recent essay, called “Masterplan of the Aryan Order” (2025a). Before reading this current essay, we advice you to take a look at that paper, where we outline the general agenda and the long-term strategic goals of the AO, as they pertain to World Order and spiritual liberation, especially in regards to the fight against psychotronic weapons – the resistance to Skynet. Also, do indeed take a look at another recent essay, called “The White Order – The Doctrine of Aufheben” (2025b), where we outline the structure and goals of the White World Order, named after the blessed and holy day of heavens. The true Aryans, the Hyperborean Siddhas, are not that many, contrary to what the newspeak term, “Indo-European”, would imply, we estimate between 10.000 and 100.000, but we are the transcendental, ethereal race, we incarnate and reincarnate (in Sanskrit, “Samsara”), and we are aligned with all Viryas of the world in the fight for spiritual liberation. This detailed exposition of the phase II out of four phases in our Masterplan, phase II, which we call the Hyperborean Initiative (HI), will lay the ground for further work of the White Order in general. Since the Aryans are not that many, it is crucial that all the Viryas of the world align with and support the AO in our work to create a new golden age, a New Ethereal Atlantis, for all the good of mankind. We will now present the main goals of the HI, where after we will give a detailed exposition of each of these elements of the plan:

- 1. HI as an umbrella organization/public front.**
- 2. Establishing the HI Commando Elite (HICE) in Copenhagen, Denmark.**
- 3. Fundraising for HI.**
- 4. Establishing a compound for collective living of the HICE – The Blue Anemone.**
- 5. Continue the development of the Aryan Academy (AA).**
- 6. Acquire research offices for the Research Institute for Spiritual Energies (RISE) and Project Spearhead Industries (PSI).**
- 7. Develop Aryan culture and lifestyle.**
- 8. Establish the general foundations of the White Order (WO).**
- 9. Disseminate White Propaganda and metapolitical agitation.**

These are the main elements of phase II of our plan. We will describe each element in depth on the next pages. It is important to make clear that we are a perfectly peaceful organization. We love each other, and have no reason to hate anyone, except that we will always claim the inalienable right to defend ourselves from aggression and violence. When we make this claim, it is, to be sure, because we are actively in the midst of resisting severe psychotronic warfare aggression against the leadership of the AO. We experience our divine crown-chakras and light-bodies being attacked in a fierce manner, so a large part of our program is to be free from those kinds of attacks, which of course, we will never tolerate. But to be clear, we do not condone any form of hatred or violence, and we only fight for truth, love, righteousness and spiritual sovereignty in defense of the soul. We invite all Viryas in the world to join us in this revolutionary project to establish the New Ethereal Atlantis, and to free the world from hatred, violence, suppression, lies and deception. But make no doubt about it, there is indeed also evil in the world, which we can verily testify, since the current powers-that-be have nefariously conspired to build the psychotronic Skynet, seeking by all means to suppress the Aryan spiritual awakening and our ethereal plans for spiritual liberation of the good of mankind, freedom from the chains of materialist thralldom – freedom from the Demiurgical system of oppression and the false light of Shambala.

Detailed exposition of all aspects of the plan

Let's now take a close look at each of these 9 elements of phase II of our Masterplan – The Hyperborean Initiative (HI):

1. HI as an umbrella organization/public front.

- a) The idea of HI is to work as an umbrella organization and public front for all of our organizations. We will here list the current official organizations, which the HI sets out to cover and represent in public:
 - 1) **The Aryan Order (AO):** Main organization for the Hyperborean Siddhas of Denmark, the rest of Scandinavia and Germany, founded in 2017. Works with the Aryan Academy (AA) and in developing Aryan culture for the 21st ct.. Main organizational organ and authority of the Aryan race.
 - 2) **The International Defense-force of Aryans (IDA):** Spiritual-paramilitary wing, which works to defend the Aryan Order from any kind of aggression. Peaceful intent, and only seeks to stand up for truth, love, righteousness and justice in the ethereal and astral realms. Operates the Epistemological Warfare Division (EWD).
 - 3) **Asgard Society of 2025 (AS25):** For Aryans. Established to pursue research into occult physics, spiritual energies, and to seek defensive measures to psychotronic warfare aggression. Tasked with setting up RISE and PSI.
 - 4) **Nirvana Society of 2025 (NS25):** For Viryas, led by AS25. The Virya equivalent of AS25. Outreach to Viryas to support the Aryan Cause, contribute to Aryan metapolitics and to the furthering of our research agenda on occult physics and defensive measures to psychotronics. Seeks to establish the White Order (WO) in general.
 - 5) **Aryan National Party (ANP):** A political party for Siddhas set to further the idea and agenda of establishing an Aryan National City State (ANCS), likely in Northern Denmark. Remember, the Aryans are only in-between 10.000 and 100.000.
 - 6) **Nordic Alliance (NA):** An international political party for all Viryas of the North to support the White Order agenda, and eventually to rule Denmark, Scandinavia and Germany as White Order Regency Councils (WORC).
- b) These are our main, official organizations, which we currently have developed, and the agendas of which we seek to propagate in the HI. The HI is an intermediary public front, which will make our operations, mobilization and outreach-programs effective and efficient.

2. Establishing the HI Commando Elite (HICE) in Copenhagen, Denmark.

- a) To further the missions of the HI, we seek to establish an elite of HI operators to define and lead the organizational structure and agendas of the HI. We shall gather an elite in the ranks of the AO and IDA to be the vanguard for the HI project. It will be a close-knit unit trained in strategic organization, mobilization and leadership, perhaps numbering about 10 persons. *Per se*, all Aryans are members of the AO and IDA, but we now seek to create an elite of day-to-day organization and command in this second phase of the Masterplan, with hands-on responsibility in actualizing and realizing the agenda of HI. The HICE should be situated in Copenhagen, Denmark, as this is where we seek to initially set up our organizational activities and wider programs.

3. Fundraising for HI.

- a) The HICE will be responsible for organizing and carrying out the fundraising for the HI. As with any new movement, and initial economic foundation is crucial, if we seek to reach our ambitious goals in the long run. In lack of funding, our movement is in danger of operational inefficiency and thereby of stagnation, whereas with proper funding and economic flow, we have many more opportunities of growth and effectivity in our operations, for example when it comes to setting up RISE and PSI, our flagship academic research programs, which are meant to establish the Aryan Defense Research Program (ADRP), among other projects. Initial funding of our operations will be crucial, also for establishing “The Blue Anemone”, which we will deal with next. Fundraising is about creating a network of sympathetic financiers, but is also about creating a communitarian way of life and economy of the HI. We are an ascetic order, so we in no way seek to enrich ourselves, other than to carry out our missions. This program is also about creating a long-term business model for the HI, finding ways to gain maximum self-sufficiency for the HI. Many projects can be envisioned for us to gain consistent financial flow in our organization, but the main project for a long-term financial foundation is in regards to the programs of the Aryan Academy (AA), and RISE and PSI, for in these two latter institutes, we seek to invent and develop technology to monitor and reinforce spiritual energies, which is an innovative, groundbreaking and revolutionary prospect, which can benefit many people in a worldwide market with great potential, so we seek now to raise capital to begin these projects. For the Viryas reading this essay, this aspect of the plan is perhaps where initially one can contribute the most to the HI.

4. Establishing a compound for collective living of the HICE – The Blue Anemone.

- a) We envision a near future, where the Aryan elite (HICE) can live together in a collective setting in the capital of Denmark to create maximum unity among our leadership and maximum effectivity in day-to-day organization activities of our organization in general. The compound we envision we call “The Blue Anemone”, named after the poem of the Danish priest and poet, Kaj Munk. A translation of that poem can be found in the appendix to this essay. For us, The Blue Anemone signifies “the eternal hope of the heart”. It has always been our dream to live together, as we are truly a heavenly collective, and the ultimate goal of the AO is to establish the ANCS, as we have mentioned, so collectivity is for the Siddhas the natural way of life, and holistically speaking, we should always work as a collective. We are ascetic and communitarian, and we make all decisions unanimously. In the future, our homelands will be ruled by a spiritual aristocracy of collective decision-making. Communitarianism means a lot to us, for our goals are solely spiritual, so we only understand ourselves in the prism of Aryan collectivity, shared life and destiny. The compound shall house the HICE of approximately 10 Siddhic leaders. We hope to acquire a large rooftop-apartment for this purpose in the inner of Copenhagen. This program of the Aryans finally going to live together will in-itself be a great milestone in our Masterplan, as rarely has this ever been accomplished before in world history, lest for in primordial times, in the ancient Atlantis before the Aryan dispersion. Times are now different, and it’s a struggle to even contemplate such a scenario, but we are determined that this is our agenda. Much of our initial work in HI will be about realizing this plan of an Aryan collective living of our leadership. Much can be gained from establishing this close-knit unit of HICE, as proximity and close friendship foster trust, creativity, dedication and determination.

5. Continue the development of the Aryan Academy (AA).

- a) While we continue to organize the Siddhas and the Viryas, our goal is to further the development of the Aryan Academy (AA). The AA is foundational and crucial in our wider program, and we envision a full-scale Academic structure, which we have described in a range of essays from this year (Riis-Søndergaard, 2025c; 2025d). Our Academy, which might later be given another, more poetic name, is founded as a bridge for spirituality and science, and based on the original and unique insights of the Hyperborean Siddhas of the North. Since 2022, we have written approximately 62 essays, which should form the foundational research and education programs of the Academy (Riis-Søndergaard, 2025e). The Aryans are uniquely suited to bring absolute, transcendental illumination unto the topics of theology, metaphysics, spirituality, mysticism, mystical poetics, esoteric psychology, and metapolitics etc., which much of our work is about, as we are the transcendental, ethereal race, but we also seek to pursue empirical science in regards to finally proving spiritual energies and the psychic aether, as well as to build a defense to the urgent threat of psychotronic weapons. We will talk about this empirical science next, but to learn more about our overall research methods, see a recent essay of ours, called “The Aletheian Method – Hyperborean Philosophy of Science and Epistemology” (2025f). Long-term, we aspire to establish the seven institutes we have so far envisioned, so a large part of the mobilization and fundraising we seek to accomplish deals with financing these institutes of the AA. The founding of the AA is a challenge to mainstream academia, and if you read our essays, you will know why, but as Colin Wilson (1971) famously said: “Mysticism is not a notion of a primitive past, but a hope and prospect for the future, for mankind to unlock its full inherent potential”. Our essays have been called “controversial”, but also “thrilling” and “very interesting”. We don’t seek to accommodate the prevailing orthodoxy, but we seek to bring fresh light and clarity onto a topic (the Aryan race), which has long been shrouded in controversy, misunderstanding and disinformation, from the unique perspective of the Hyperborean Siddhas themselves. Let us now turn to our flagship academic project.

6. Acquire research offices for the Research Institute for Spiritual Energies (RISE) and Project Spearhead Industries (PSI).

- a) RISE and PSI are set up to be the theoretical and applied science divisions of the AA respectively. RISE seeks to research and prove spiritual energies and the psychic aether, while PSI works to develop technology to monitor these fields, and to develop and build defensive measures to threats against spiritual sovereignty, notably psychotronic weapons. Much is obviously at stake in this enterprise, for if we succeed in proving these energies and realities, which we know from first-hand experience are absolutely true and fundamental to the Siddhas, and by the way, which must already be empirically known, only in the Black Projects of our adversaries, we will succeed in ushering in a whole new scientific paradigm with the prospect of a New Ethereal Atlantis, a new golden age for mankind, and therefore we consider this enterprise of RISE and PSI our flagship project. It is not only our interest to do so, but it’s adamant of us, so that we may be able to defend ourselves from the dire threat of psychotronic weapons, which have been deployed to suppress the Hyperborean awakening, probably for many decades now, but for sure in these times, where psychotronic weapons are at the top of the agenda of (occult) geopolitics. These weapons work to infringe upon and suppress the spiritual energies and collective psyche of the Hyperborean collective, so we must be able to defend ourselves against this urgent threat (2024a; 2025g).

7. Develop Aryan culture and lifestyle.

- a) While we organize and finance HI, we will continue our work to develop the communal Siddhic lifestyle with all which that encompasses of spiritual exploration, such as Kundalini-yoga, transcendental meditation, chants, songs, music, art, veganism, asceticism, etc.. The Siddhic lifestyle is inherently bound upon the transcendental aether and the collective consciousness of the Aryan Order. If not for the aether, we truly were nothing. The aether is *all* to us, as we explore in for example the essay, called “Flight of the Veda-Dove” (2024b), which gives a very rare insight into the modern-day lifestyle of the secretive, reclusive Aryan elite. See also our other essays on modern-day Aryan culture and lifestyle (Riis-Søndergaard, 2024c; 2024d; 2024e). Truly, the Siddhic lifestyle, especially as it is practiced by the Hyperborean Aryans, is a threat to the current atheist and materialist world order, so much has to be done to acclimatize the world culture to the Aryan surge and cultural renewal of our homelands. But I beg your pardon: Why do our enemies hate us so much that they have deployed psychotronic weapons, so vehemently, as if that was their sole purpose in life, when the Aryans are a perfectly peaceful, spiritual and loving race? This is the true, crucial question mankind and world leaders *must* answer, if we ever are to make progress towards the New Ethereal Atlantis, the new golden age, leaving Kali Yuga behind us, which we are determined to do. The answer to this question might be related to the fact of the Veda White Vow, which the Aryans have sworn, to never tolerate evil, and to combat and defeat evil, wherever it arises, which you can read more about in our essays.

8. Establish the general foundations of the White Order (WO).

- a) Let’s us now turn to another crucial aspect of our plan, namely the foundations of the White Order, aka. the White World Order, the Order of the Day, the Order of the Heart. It goes without saying that to accomplish our ambitious plans on behalf of all good people of the heart, people of the Immortal Tear, we will need the alignment and support of all Viryas (wise warriors) of the world. Luckily, we find that most people are inherently good people, people endowed with a soul and upright ethics. But is this true for all people? “Warum Krieg?”, as Einstein and Freud (1933) famously asked, and as Hegel (1837) said: “If we can learn anything from history, it is that history is a slaughter-bench”. There must be a deep-seated conflict in the nature of history, which we now seek to solve by presenting the true theology and metaphysics, amounting to a true political theology, namely what we term metapolitics. We find that the cause of all conflict and war in world history is due to a lack of a sound theology and metaphysics, which honestly only the true Aryans, the Hyperborean Siddhas, can present. Truth is not a relativistic “game of semantics”, but is absolute, no matter how much ordinary people and present academia fear this notion, but is this fear of absolutism, of absolute ethics and morals, due to people fearing themselves at the existential core? For fear of their true nature (for there is a true nature, a call of the heart)? We will not attempt to answer this fundamental question in this essay, we only want to affirm that there is a true cause, there is a *telos*, there is an ontology and there is an existential call. The Academy is about exploring these types of fundamental questions, which the WO will be build upon. The White Order shall be based upon the truth and law of the heart, on the existentials (Heidegger, 1927) of the *heart* of war. In no way an aggressive or violent politics, only an affirmation that mankind has the duty to stand up for exactly *the heart*, with all the truth that implies, and for us, the heart is heavens. We say this to make it absolutely clear to the current powers-that-be that we will never tolerate aggression against the heart.

9. Disseminate White Propaganda and metapolitical agitation.

- a) Now that we outlined the agenda of the HI, it is naturally that the last part of our current program, the phase II, which we estimate will last for about 7-8 years, is about the dissemination of our agenda and ideas, the mobilization of allies, and the call to organize in favor of the White Order. Remember, we don't use the terms "White Order" or "White Propaganda" in any conventional, biological racial and ethnic sense, only to denote "the Order of the Heart (heavens), and the "Truth of the Heart" (the call), which are "White" as a sign of spiritual purity, sincerity and honesty, as we conceive the transcendental aether to be. Our program is a purely spiritual project, which is about uplifting and elevating all good people of the heart, for a much better and spiritual future, rather than the endless and fruitless thralldom of a materialistic science and politics, which so dominate the world order today. We use the term "White Propaganda" as a contrast to the historical notorious "Black Propaganda" of disinformation and deception that seeks to confuse and disorient the masses. We stand for truth, absolutely, this must be made absolutely clear to our readers. And the truth is heavens. To prove our theories, we have set up both the AA and the Epistemological Warfare Division (EWD), for these programs are urgently needed in a world of inversion and deception as to the true nature of spiritual man, the cause of creation, the nature of existence, and the spiritual purpose and destiny of mankind. We fight for the true, Hyperborean light of Agartha (Ultima Thule) against the false, demiurgical light of Shambala.
- b) Agartha (white/true/good) and Shambala (black/false/evil) is an esoteric dichotomy of the "subterranean" Order of Light versus the Principalities of Darkness, and the cosmic war that these two orders are engaged in. You can read more about this dichotomy in a recent essay of ours, called "The Light of Agartha – Esoteric, Hyperborean Symbolism" (2025h). We are seeking our the "deeper layers of politics", "the depths of the occult war", as Evola (2002) rightly noted, when he said that "there is today not a field, where the occult war has not been enacted". An inspiration of ours, and one of those who before the AO has made very important and valuable contributions to the Hyperborean Cause, is the esotericist and gnostic, Nimrod de Rosario (1985; 2022; 2023), which we encourage all our readers to read and make note of.

Having presented the key points of the HI-project, phase II of the Masterplan, we will end this essay with some general remarks on the agenda of the AO and some reflections on the Aryan Cause, especially in regards to the ethics and moral stance of the Order and the Initiative, but also some general strategic remarks on how to proceed. In an age of inversion and decay (Kali Yuga), it is important to note that truth may be controversial, but that doesn't mean that truth is not right or morally wrong. For example, when the concept of "the Aryan race" is considered an illusionary and dangerous concept, the cause of all evil, the cause of heinous war crimes, and then the true Aryans step forth to correct the narrative in a peaceful and benevolent manner, should we not then listen to what the actual, true and real Aryans have to say? We cannot outright discard of the Aryan voice, just because history has tainted that very concept, when we know that the concept has a much more rich, deep, cultural and ancient history, than how it has been used in recent history. Just because we flatly deny the existence of the biological Aryan race, doesn't make that very reality of the Aryans disappear, when the true Aryans themselves come forth to tell of who we *truly are* (a spiritual, transcendental, ethereal race of only between 10.000 and 100.000 incarnations). In the final section of this essay, we will discuss some general remarks on the Aryan Cause.

Reflections on the Aryan Cause and peaceful intent

The term “Aryan” means “pure, free, noble and elevated spirit”. The term “Siddha” means “perfected, liberated master”. It is solely in this ancient, original, spiritual and Vedic sense that we use these terms, for they are dear and valuable to us as signifiers of origin, identity, community and spiritual purpose and destiny – they are cultural signifiers of what it means to be “the true man of the heart”, the White (ethereal) Day of Heavens. Modern-day Humanism denies all spiritual hierarchies, but how come they then with the other hand behind their backs fiercely attack the crown-chakras and light-bodies of the Hyperborean Siddhas with psychotronic weapons, as if that was any sign of “humanism”. Why do the powers-that-be fear the Aryan awakening, gathering and agenda so much, when this agenda is perfectly peaceful, and only seeks to bring spiritual enlightenment, justice and liberation to mankind? No one can deny the very existence of the Hyperborean Siddhas, for our presence and order resonate in the aether, and why do they anyway attack us so hatefully in the astral realm, if they didn’t believe us to exist? In two years, we can celebrate the 10th anniversary of the AO/IDA, and we tell you, it has been a marvelous journey so far, full of joyous moments, memories and spiritual victories, but also a journey fraught with much resistance towards our community, aggression, hatred and violence against our respected leadership, who has taken on the Herculean effort to awaken, unite and define the Hyperborean cause in the face of immense adversarial antagonism on the part of “the system”. So it is a struggle – a struggle to be true, to be faithful and to be free. When reading our essays, can anyone be in doubt of our sincere and peaceful intents or deny us our claim to spiritual enlightenment and liberation in a world, where war and violence are so common – where the psychotronic suppression is so forcefully enacted, as if this was the last stand? Our adversaries are truly desperate. Why else would they resort to the “last weapon” of attacking the soul and psyche directly? These might be hard questions to contemplate, and the reality of this metaphysical, spiritual and occult war is deeply buried away by the current globe holders, but thanks to the internet, we can now collect evidence from a wide range of sources, which confirms the reality experienced by the AO/IDA leadership. Just look up the words “covert electronic harassment”, “covert human experimentation”, “psychotronic weapons”, “directed energy weapons (DEW)”, “Havana syndrome”, “scalar weapons”, and similar key words to know that this reality of “the Skynet” is ever coming to reality, but is kept in the dark by the powers-that-be – it’s the frontier of the 21st ct. occult war, which we describe in a set of essays (Riis-Søndergaard, 2024a; 2025i; 2025j). The reality is far more concerning, than what can readily be found on the internet, and we wish to state that our own knowledge of the deployment of the Skynet is based on first-hand, experience-based evidence, which also is the ground for our research at RISE and PSI, but the technology is definitely there and has been there since after the Second World War. In this phase of our plan, much rests on the success of establishing the AA, but of course first of all on uniting and organizing the Hyperborean Siddhas and our Virya allies in the WO, raising a sustainable economy for our programs, acquiring and setting up offices for our flagship projects, but every new movement has always had a rough start, and with the ambitious and spiritual-revolutionary program we have set forth, it is no wonder that we also meet resistance from the entrenched wielders of power today, be it in politics, religion, academia or culture – “deep in the trenches”, as we say. The current global control society (Deleuze, 1992) rests on an infantile and helpless populace that cannot stand up for their spiritual rights and defend the soul against the atheist and materialist black propaganda and subtle suggestions in media, education and politics, so it is up to the HI to break this suppression and bottleneck of political-spiritual awakening to unleash to true spiritual potential of mankind for a much better future – a future, free from spiritual suppression, lies, manipulation and deception – “the eternal hope of the heart”, as the Danish poet, Kaj Munk, famously portrayed in his poem, “The Blue Anemone”, which will end this essay. Thank you for tuning in to the Hyperborean broadcast.

Appendix: Translation of Kaj Munk's Danish poem "The Blue Anemone"¹

Whatever happened?
 The quartz of my winter frozen heart
 will have to melt by seeing it
 on the first day of March.
 What broke through the black soil
 and with its sea blue bloom gave it
 a dash sky's shade?
 The little anemone
 I planted there last year

I got it from Lolland,
 an endearment from my birth island.
 So here I was waiting
 thinking: »It's going to die;
 obviously, it misses its forest area,
 its warm air, its fat clay;
 in this hostile zone,
 my anemone will perish;
 I'll never see it again«.

There it is now, nodding
 so victoriously in the Jutlandic gravel
 indomitable and confident
 in spite of loneliness and haze,
 as though all kinds of adversity here
 have given it a greater value,
 a little amazon,
 and yet my anemone
 like the waving shine of the lake

Whatever happened?
 My heart, cold and hard like quartz
 is melting seeing it
 on the first day of March.
 I thought: »Forever separating were
 my soul and happiness«. when I sat
 in the grim trap of winter.
 Now my anemone makes
 me free and happy once more.

Because this clean colour,
 it seems to me like consecration of spring,
 it lets me neonatally inherit
 an eternity of hope.
 Then I bow down towards the earth,
 tenderly stroking your silk bloom,
 a peace of the throne of mercy.
 Oh, little anemone,
 how our creator is great!

1 The Danish poet, Kaj Munk's, "Den Blå Anemone". Translated by SweaterCat, <https://lyricstranslate.com/en/den-bl%C3%A5-anemone-blue-anemone.html>
